EXECUTIVE SUMMARY | 5-MINUTE OVERVIEW

IndiMarg

Pharma ERP

A Smarter Way to Manage Your Pharmacy Business

A desktop-based pharmacy management solution designed to simplify everyday operations — from GST-ready billing and purchases to inventory, medicine batches, and expiry tracking.

PRESENTED BY

Indilens Web Solutions Private Limited

From Scattered Records to One Organized System

Running a pharmacy involves more than selling medicines.

Today

- Manual registers and disconnected tools
- Hard to track stock, batches and expiry dates
- Billing and records prone to manual errors
- Limited visibility into day-to-day business

With IndiMarg

- Billing, purchases and inventory in one desktop application
- Batch and expiry information kept in view
- Invoice history with print and export
- Offline-first: daily work does not need constant internet

THE OPPORTUNITY

A single, organized system can bring everyday pharmacy operations into clearer view.

Designed for Everyday Pharmacy Work

Practical features for real pharmacy operations.

01

Billing and Sales

Create and manage customer sales transactions.

02

Purchase Management

Record medicine purchases and maintain purchase history.

03

Inventory Management

Maintain medicine stock records and monitor available inventory.

04

Batch Management

Keep medicine batch information organized.

05

Expiry Tracking

Monitor expiry information to support timely stock management.

06

Business Records

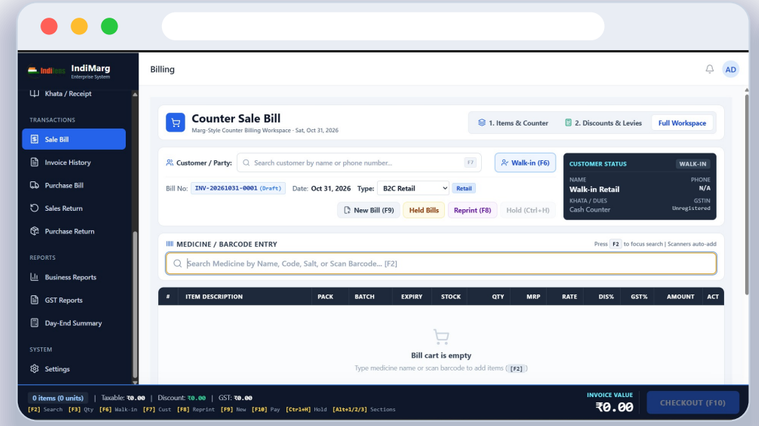

Access historical transaction information when needed.

ALSO IN THE PRODUCT

GST-ready billing | Barcode / salt search | Print and reprint invoices | Export to CSV / Excel | Day-end summary | GST reports

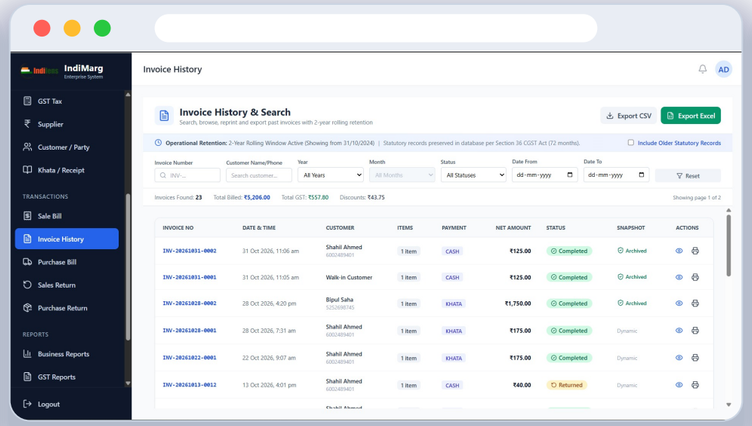

One Application. Every Daily Workflow.

Real screens from the IndiMarg desktop application.

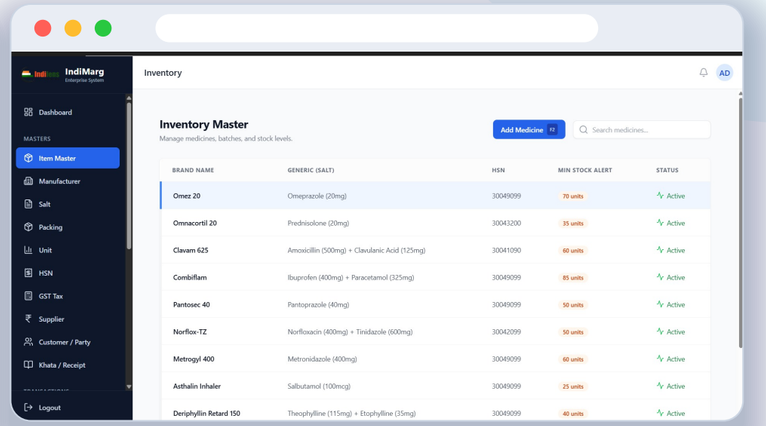

Billing and sales

Create bills, record items and keep sales records.

Invoice history

Search, review, print and export past invoices.

Inventory and expiry

Medicine, stock, batch and expiry information.

Offline-first

Daily work does not depend on constant internet.

Backup options (planned)

Local, third-party and cloud backup.
